COLLEGE OF ENGINEERING SCIENCES,
TECHNOLOGY AND AGRICULTURE
OFFICE OF THE DEAN
217 PERRY PAIGE BUILDING

July 20, 2010

Cynthia Hayes
Executive Director
Southeastern Green Network Inc.
213 W. 38th Street
Savannah, Georgia 31401

Dear Mrs. Hayes:

I would like to extend the College of Engineering Sciences, Technology and Agriculture's (CESTA) support for SoGreen Network's Green Up Your Campus Summit to be held here at Florida A & M University February 18th and 19th, 2011.

Providing information, training, and education on best practices for current environmental issues to our students, faculty and administration has always been a goal of CESTA and FAMU.

CESTA's participation in SoGreen Network's Greening The Southeast Summit held in Savannah, Georgia in April was to assist in developing a platform for the continuous dialogue necessary for our 1890 Land Grants and HBCUs to better understand the role they must play in creating partnerships and a common agenda with all members of the southeastern community to address environmental issues such as climate change, alternative fuel sources, sustainable agriculture, and local food access.

We look forward to working with you to ensure Green Up Your Campus 2011 at Florida A&M University is also a successful event. I also accept your invitation to set on the Advisory Committee for Green Up Your Campus 2011

Should you have any questions or concerns, please feel free to contact me at (850)561-2644 or by email at makola.abdullah@famu.edu.

Sincerely,

Makola M. Abdullah
